

We Claim:

1. A nacelle for a gas turbine engine, the engine comprising accessories mounted to a fan casing and a core engine, the nacelle substantially surrounds the engine (10) and comprises an intake and a thrust reverser unit, the thrust reverser unit is formed by two generally C-shaped and openable portions characterised in that the thrust reverser unit is openable to provide access to the accessories and the core engine.
2. A nacelle as claimed in claim 1 wherein the nacelle comprises a fan containment casing, the fan containment casing is integral with the intake.
3. A nacelle as claimed in claim 2 wherein the intake comprises an acoustic panel that extend between a downstream edge of the fan containment casing and a leading edge of the intake, thus reducing engine-generated noise.
4. A nacelle as claimed in claim 2 wherein the fan containment casing is disposed outside a fire zone of the nacelle.
5. A nacelle as claimed in claim 2 wherein the fan containment casing is releasably attached to the intake and the fan casing.
6. A nacelle as claimed in claim 5 wherein at least one access panel is provided radially outwardly of the fan containment casing to allow access thereto.
7. A nacelle as claimed in claim 1 wherein at least one access door is provided in the C-shaped portions radially outward of the fan casing to allow access thereto.
8. A nacelle as claimed in claim 7 wherein at least one access door is pivotably attached to the C-shaped portions and is openable only when the C-shaped portions are closed.
